

Guy C. Patrick, P.Eng., M.Sc.

With over 25 years in environmental consulting, Mr. Patrick provides senior technical review and direction for environmental investigations, sediment remediation strategies, groundwater protection plans and remedial projects across Canada and globally.

His work has focussed on soil, sediment and groundwater contamination issues and risk management strategies at solid waste, industrial and commercial facilities containing dense liquids (DNAPLs) such as creosote, coal-tar, and chlorinated solvent (*e.g.*, PCE and TCE,) as well as petroleum hydrocarbons and metals.

Mr. Patrick is a Senior Hydrogeologist and Principal with Golder Associates Ltd. in BC and a Registered Professional Engineer in BC, the Yukon, Saskatchewan, and Nova Scotia. He serves as a board member of the Contaminated Sites Approved Professionals (CSAP) society in BC, and is a frequent speaker at conferences and educational institutions.
