

## **Thomas S. Wang, P.E.**

**Senior Partner  
Anchor QEA, LLC**

Mr. Thomas S. Wang, P.E. is a Senior Partner at Anchor QEA, LLC and manages the firm's engineering discipline. Mr. Wang is a registered Professional Engineer with more than 20 years of experience designing and implementing complex dredging, sediment remediation and coastal engineering projects, both in the United States and internationally. He has been involved with many of the largest and most complex sediment remediation projects in the United States and British Columbia. Mr. Wang is one of the very few engineers to have constructed all of the broad spectrum of sediment remedial technologies, including: environmental dredging, in-situ capping, confined disposal facilities (CDFs), contained aquatic disposal (CAD), enhanced natural recovery (ENR), ex-situ treatment (e.g., solidification/stabilization, bioremediation, thermal desorption), and beneficial re-use of dredged sediment.

Mr. Wang is an internationally recognized dredging expert, and was awarded the Western Dredging Association's 2004 "*Dredger of the Year*" honor. In 2006, he was selected by the U.S. Army Corps of Engineers to be the United States representative to the International Navigation Association (PIANC) for developing guidance for dredging best management practices. Mr. Wang is currently a national director of the Western Dredging Association.
