

An aerial photograph showing a large industrial or commercial site with several buildings, some of which appear to be in various stages of demolition or dismantling. The site is situated next to a large body of water, possibly a reservoir or a bay. The surrounding area includes residential neighborhoods with houses and trees, and a road network. The overall scene suggests a complex remediation or redevelopment project.

Technical Seminar Clean-up and Redevelopment of Contaminated Sites

Dr. Reidar Zapf-Gilje, UBC, RZG Consulting

Dr. Loretta Li, UBC

Ian Hers, Golder Associates Ltd.

Waldemar Braul, McDonald and Co

Introductions and Course Outline

**Part 1 - History, Contaminants,
Regulations and Case Studies**

Part 2 - Contaminated Site

Investigation and Management

**Part 3 - Risk Assessment Framework
and Problem Formulation**

**Part 4 - Contaminant Fate and
Transport**

**Part 5 - Source Reduction and
Treatment Technologies**

Part 6 - In-situ Management

Wrap-up and Discussion
